EDUCATION

The University of Texas at Austin – McCombs School of Business Austin, TX	May 2027
Master of Science, Business Analytics	
The University of Texas at Dallas Richardson, TX	May 2026
Bachelor of Science, Computer Information Systems	

TECHNICAL SKILLS

- **Computer Software:** Access, Visio, Excel, Tableau, Power BI, Alteryx Designer, Jira
- **Computer Languages:** R, Python, SQL, Next.js, HTML5, CSS, TypeScript, Java, PostgreSQL, JavaScript
- **Certifications:** AWS Certified Cloud Practitioner, Google Advanced Data Analytics Professional Certificate

EXPERIENCE

Sudur Capital – Frisco, TX	
<i>Full-Stack Web Development Intern</i>	October 2025 - January 2026
• Designed and implemented a responsive full-stack platform using Next.js, TypeScript, HTML5, CSS, and PostgreSQL, ensuring scalable and optimized data solutions while significantly improving user engagement and accessibility • Developed and launched a real estate investment portal that allowed investors to register, evaluate opportunities, and invest in projects while enabling sponsors to showcase land developments and attract funding seamlessly • Accelerated the delivery of the portal's MVP within 3 months by writing and managing 20+ user stories in Jira, streamlining workflows, enhancing collaboration, and consistently meeting aggressive project deadlines	
Maxwell IoT Technologies – Plano, TX	
<i>IoT Systems & Performance Intern</i>	April 2022 - June 2022
• Expanded the IoT product network by 20% through the development of a mobile application and the integration of innovative connectivity strategies that strengthened system scalability and reliability • Boosted device productivity by 15% by applying advanced LoRa WAN technology to build a robust and efficient network, while gaining deep expertise in IoT performance analysis and optimization • Increased the number of active devices by 25% by supporting system testing, troubleshooting, and client issue resolution, while documenting solutions that enhanced customer satisfaction and system performance	

PROJECTS

AI-Powered Resume Builder – AI Engineer	January 2026 - Present
• Built an intelligent resume-tailoring system using GPT-4o-mini with domain detection across 4 major industries, improving keyword recall by 40% and generating ATS-optimized resumes that dynamically adjust density to match job descriptions • Designed generative optimization pipelines that reorder skills by relevance, evaluate resume completeness, and rewrite bullets while preserving structure and metadata—boosting ATS match alignment by 30–35% across test job descriptions • Deployed the platform using Dockerized FastAPI (LLM inference) and LaTeX-based PDF generation on Render & Vercel with CI/CD automation, enabling scalable, production-ready AI-driven resume personalization	
Personal Finance Health Predictor – Machine Learning Engineer	August 2025 - November 2025
• Built an end-to-end ML platform processing over 285,000 financial records to deliver credit risk prediction, fraud detection, achieving 85.7% recall for fraud detection using XGBoost and SMOTE • Engineered over 26 features, created 40+ visualizations (ROC curves, confusion matrices, feature plots), and identified 4 customer personas through clustering to enable personalized financial recommendations • Deployed the system with FastAPI using 3 prediction endpoints, Pydantic validation, delivering production-ready APIs that reduced manual loan review effort by 30% and improved marketing conversion by 15 -20%	
NBA Schedule Analysis Project – Data Science Analyst	May 2024 - July 2024
• Processed and analyzed over 1,200 NBA schedule records using Python, pandas, and Jupyter Notebook to evaluate patterns in game density, rest days, and back-to-back sequences across multiple seasons • Developed more than 10 statistical models and visualizations with matplotlib and seaborn, providing clear insights into scheduling effects and ensuring results were presented in an accessible and professional format. • Improved workflow efficiency and reproducibility by 30% by implementing structured coding practices, documenting each step thoroughly, and delivering well-organized analytical outputs for future reference.	

ADDITIONAL INFORMATION

Languages: English, Kannada, Telugu, and Hindi
Work Eligibility: Eligible to work in the U.S. with no restrictions
